

**EPA REGION 9
SEMI-ANNUAL BRAC REPORT
OCTOBER 1, 2012 – MARCH 31, 2013**

Site Name: Treasure Island Naval Station, CA

EPA RPM:	David Stensby	415- 972-3246	stensby.david@epa.gov
State RPM:	Remedios Sunga	510- 540-3840	rsunga@dtsc.ca.gov
	Ross Steenson	510-622-2445	rsteenson@waterboards.ca.gov
DoD BEC:	Keith Forman	619-532-0913	keith.s.forman@navy.mil

I. Significant Issues:

- a. Congressional: No congressional issues to report at this time.
- b. High Profile Items: There were several media reports about newly discovered potential radiological contamination. The reports were based upon an August 6, 2012 *Draft Historical Radiological Assessment – Supplemental Technical Memorandum*. Since the last report, additional media coverage and citizen concern have emerged. EPA has closely followed the media coverage and responded to citizen and media inquiries. EPA's radiological technical support has reviewed several documents and provided comments as necessary. The Navy has recently conducted more radiological surveys that detected slightly elevated readings in public areas. There was an immediate response to reduce readings to background levels. Additionally, the Navy is planning a base-wide radiological assessment. EPA will continue to closely monitor the situation and respond as needed.
- c. Delays in Environmental Restoration Actions: None at this time. The Navy will prioritize cleanup to facilitate transfer of some parcels.

II. Issues Impacting Transfer: None at this time.

III. Staffing/Funding Issues: None at this time.

IV. MOU Support Updates:

The EPA RPM participates in BRAC Closure Team meetings and reviews documents as provided. EPA continues to support the Navy's efforts to cleanup and transfer the property. EPA continues to respond to public and media inquiries.
